Specifying a column width	218
Using a mouse to set the column width	219
Setting the standard width of all columns	220
Using Excel's AutoFit feature to set column width.....	220
<i>Adjusting the row height</i>	220
Specifying a row height.....	221
Using the mouse to set the row height	221
Using Excel's AutoFit feature to set row height.....	222
<i>Hiding Columns and Rows</i>	222
Hiding and unhiding columns	222
Hiding and unhiding rows	223
Just the facts	224
8 Working with Ranges	225
Understanding ranges.....	225
Selecting a range.....	226
<i>Mouse techniques for selecting a range</i>	226
<i>Mouse tricks for selecting a range</i>	227
<i>Keyboard techniques for selecting a range</i>	228
<i>Keyboard tricks for selecting a range</i>	229
<i>Specifying a range input in a dialog box</i>	230

Working with named ranges.....	231
<i>Range name restrictions</i>	231
<i>Naming a range</i>	232
Naming a range using the Name box.....	233
Naming a range using worksheet text	233
<i>Using a range name</i>	234
Filling a range with data.....	235
Filling a range with a series of values	235
Copying a range	236
Moving a range	237
Inserting a range.....	237
Deleting a range.....	238
Using a range as a database	239
<i>Sorting a range</i>	239
<i>Filtering a range</i>	240
Activating the filter	240
Filtering by the data in a column.....	240
Creating a custom filter.....	242
Controlling the range display with an outline.....	243
<i>Creating an outline automatically</i>	245
<i>Understanding the outline tools</i>	246
<i>Creating an outline manually</i>	247
Grouping rows and columns.....	247
Ungrouping rows and columns	248
<i>Hiding and showing detail data</i>	248
Hiding detail data	248
Showing detail data	249
<i>Selecting outline data</i>	249
<i>Removing an outline</i>	249
Summarizing numeric data with automatic subtotals	249
<i>Adding subtotals to a range</i>	250
<i>Adding multiple subtotals</i>	252
<i>Removing subtotals</i>	254
Just the facts	254
9 Manipulating Formulas and Functions	255
Making on-the-fly calculations.....	256
Two-click formulas	257
Creating your own formulas.....	258
<i>Creating a simple formula</i>	258
<i>Making changes to an existing formula</i>	260
<i>Understanding formula operators</i>	260
<i>Avoiding problems with cell references</i>	261
<i>Avoiding relative reference adjustments when copying</i> <i>a formula</i>	264
<i>Controlling the order of calculation</i>	265

Using functions for faster, more powerful formulas.....	267
<i>Entering functions directly</i>	268
<i>Entering functions with the Function Wizard</i>	269
Excel's function types.....	271
<i>Financial functions</i>	271
<i>Math and trig functions</i>	274
<i>Statistical functions</i>	276
<i>Text functions</i>	278
<i>Date and time functions</i>	280
<i>Logical functions</i>	282
<i>Lookup functions</i>	283
Just the facts.....	285
10 Visualizing Data with Charts.....	287
Reviewing chart elements.....	287
How Excel converts worksheet data into a chart.....	289
Creating a chart.....	290
<i>Creating an embedded chart</i>	291
<i>Creating a chart in a separate sheet</i>	292
Activating a chart.....	293
Moving a chart between a chart sheet and a worksheet.....	293
Changing the chart type.....	294
<i>Understanding Excel's chart types</i>	295
2-D area chart.....	295
2-D bar chart.....	296
2-D column chart.....	296
2-D line chart.....	298
2-D pie chart.....	299
Radar chart.....	299
XY (scatter) chart.....	300
Bubble chart.....	301
Doughnut chart.....	302
3-D charts.....	303
<i>Setting the default chart type</i>	305
Selecting chart elements.....	305
Formatting charts.....	306
<i>Formatting chart elements</i>	307
<i>Formatting a chart axis</i>	308
<i>Formatting chart data markers</i>	310
<i>Displaying and formatting chart gridlines</i>	310
<i>Adding chart text</i>	311
Adding titles.....	311
Adding a chart legend.....	312
Adding data marker labels.....	312
Saving your work as a template.....	313

Editing the data source	313
<i>Changing data series values</i>	313
<i>Working with series formulas</i>	315
<i>Editing a series formula</i>	316
<i>Adding a data series</i>	317
<i>Deleting a data series</i>	318
Just the facts	318

IV Communicating with Outlook.....319

11 Sending and Receiving E-Mail.....321

Setting up your first account.....	321
Getting acquainted with the mail folders.....	322
Composing and sending a new message.....	325
<i>Composing a message</i>	325
<i>Using the Contacts list to specify recipients</i>	326

<i>Setting up an automatic slide show</i>	493
<i>Annotating slides</i>	494
Just the facts	494

VI Managing Data with Access.....497

17 Working with Databases and Tables.....499

Creating a table	499
<i>Creating a table using the Datasheet view</i>	500
<i>Creating a table using the Design view</i>	500
Specifying a name for the field	502
Assigning a data type to the field	502
Typing a description for the field	503
Setting the field properties	503
Creating a custom data format.....	504
Specifying an input mask.....	506
Setting up a validation rule	510
Setting the primary key	511
Saving the table.....	511
Working with fields.....	512
<i>Importing external data</i>	513

Entering data.....	514
<i>Understanding the Datasheet view</i>	514
<i>Navigating fields</i>	516
<i>Entering data</i>	516
<i>Adding more records</i>	517
<i>Navigating records</i>	518
<i>Selecting a record</i>	519
<i>Deleting a record</i>	519
<i>Formatting the datasheet</i>	519
Changing the datasheet column sizes	519
Changing the datasheet row heights.....	520
Sorting records.....	520
<i>Sorting on a single field</i>	521
<i>Sorting on multiple fields</i>	521
Filtering table data.....	522
<i>Filtering by field value</i>	524
<i>Filtering by partial field value</i>	524
<i>Filter excluding field value</i>	525
<i>Filter excluding partial field value</i>	525
<i>Filtering by form</i>	526
<i>Creating an advanced filter</i>	527
Relating multiple tables	528
<i>Understanding referential integrity</i>	530
<i>Relating tables</i>	530
Just the facts	532
18 Querying Data	533
Designing a simple query	534
<i>Adding fields to the query</i>	535
<i>Specifying the query criteria</i>	536
<i>Running the query</i>	536
Understanding query criteria	538
<i>Using operands in criteria expressions</i>	538
<i>Using operators in criteria expressions</i>	539
Comparison operators	539
Arithmetic operators	540
The Like operator	541
The Between...And operator	542
The In operator.....	542
The Is Null operator	542
Compound criteria and the logical operators	542
Entering And criteria.....	543
Entering Or criteria	544
Combining And and Or criteria.....	545
Logical operators.....	546
<i>Working with the Expression Builder</i>	547

Using calculations in queries	548
<i>Working with totals columns</i>	548
Setting up a totals column	549
Creating a totals column for groups of records	550
<i>Setting up a calculated column</i>	552
Creating a multiple-table query.....	553
<i>Adding multiple tables to a query</i>	554
<i>Adding fields from multiple tables</i>	554
Modifying table data with update queries	557
Removing records from a table with delete queries	559
Creating new tables with make table queries.....	560
Adding records to a table with an append query	561
Just the facts	562
19 Creating and Using Forms.....	563
Creating a basic form	563
<i>Creating a Simple Form</i>	564
<i>Creating a Split Form</i>	565
<i>Creating a Multiple Items Form</i>	565
Running the Form Wizard.....	566
Navigating form fields and records	568
Using Design view to build a form	569
<i>Switching to Design view</i>	569
<i>Understanding form controls</i>	569
