Part I	Unleashing Day-to-Day Windows Vista	
1	An Overview of Windows Vista	1
2	Customizing and Troubleshooting the Windows Vista Startup	39
3	Exploring Expert File and Folder Techniques	65
4	Mastering File Types	103
5	Installing and Running Applications	123
6	Getting the Most Out of User Accounts	149
7	Working with Digital Media	181
8	Vista's Tools for Business: Contacts, Calendar, and Faxing	209
9	Mobile Computing in Windows Vista	247
Part II	Unleashing Essential Windows Vista Power Tools	
10	Using Control Panel and Group Policies	275
11	Getting to Know the Windows Vista Registry	291
12	Programming the Windows Scripting Host	313
Part III	Unleashing Windows Vista Customization and Optimization	
13	Customizing the Windows Vista Interface	351
14	Tuning Windows Vista's Performance	373
15	Maintaining Your Windows Vista System	403
16	Troubleshooting and Recovering from Problems	437
17	Getting the Most Out of Device Manager	457
Part IV	Unleashing Windows Vista for the Internet	
18	Exploring the Web with Internet Explorer	479
19	Communicating with Windows Mail	515
20	Participating in Internet Newsgroups	543
21	Implementing Windows Vista's Internet Security and Privacy Features	563

Part V	Unleashing Windows Vista Networking	
22	Setting Up a Small Network	609
23	Accessing and Administering the Network	631
24	Making Remote Network Connections	663
Part VI	Appendixes	
A	Vista Keyboard Shortcuts	683
B	Using the Windows Vista Command Prompt	691
C	Automating Windows Vista with Batch Files	725
	Index	751

4 Mastering File Types	103
Understanding File Types	103
File Types and File Extensions.....	104
File Types and the Registry.....	106
Working with Existing File Types.....	108
Setting the Default Action.....	108
Creating a New File Type Action.....	109
Example: Opening the Command Prompt in the Current Folder ...	111
Hiding a File Type's Extension	112
Associating an Extension with a Different Application	113
Associating an Application with Multiple File Types	115
Creating a New File Type.....	115
Associating Two or More Extensions with a Single File Type.....	116
Customizing the New Menu.....	117
Adding File Types to the New Menu.....	118
Deleting File Types from the New Menu	118
Customizing Windows Vista's Open with List.....	118
Opening a Document with an Unassociated Application.....	119
How the Open With Feature Works.....	120
Removing an Application from a File Type's Open With Menu	120

Removing a Program from the Open With List.....	121
Adding a Program to the Open With List.....	121
Disabling the Open With Check Box.....	122
From Here	122
5 Installing and Running Applications	123
Practicing Safe Setups	123
User Account Control and Installing Programs.....	124
Running Through a Pre-Installation Checklist.....	124
Installing the Application.....	130
Applications and the Registry.....	131
Program Settings.....	131
User Settings	131
File Types	132
Application-Specific Paths	132
Launching Applications.....	132
Controlling AutoRun Behavior for Programs	134
Launching Applications and Scripts at Startup	134
Running a Program with the Administrator Account	139
Creating Application-Specific Paths.....	140
Controlling Startup Programs with Windows Defender	141
Understanding Application Compatibility	142
Determining Whether a Program Is Compatible with Windows Vista..	143
Understanding Compatibility Mode.....	144
Scripting Compatibility Layers.....	145
From Here	148
6 Getting the Most Out of User Accounts	149
Understanding Security Groups	149
User Account Control: Smarter User Privileges.....	151
Elevating Privileges.....	153
File and Registry Virtualization.....	154
User Account Control Policies	155
Creating and Managing User Accounts.....	156
Working with the User Accounts Dialog Box	158
Adding a New User	158
Performing Other User Tasks.....	159
Working with the Local Users and Groups Snap-In	160

Setting Account Policies	161
Setting Account Security Policies	161
Setting User Rights Policies	163
Setting Account Lockout Policies	164
Working with Users and Groups from the Command Line	165
The NET USER Command	165
The NET LOCALGROUP Command	166
Creating and Enforcing Bulletproof Passwords.....	167
Creating a Strong Password.....	167
User Account Password Options	168
Taking Advantage of Windows Vista's Password Policies	169
Recovering from a Forgotten Password.....	170
Sharing Files with Other Users	171
Using Parental Controls to Restrict Computer Usage.....	172
Activating Parental Controls and Activity Reporting	173
Example: Setting Up Parental Controls for Games.....	175
Sharing Your Computer Securely.....	179
From Here	180
7 Working with Digital Media	181
Setting AutoPlay Defaults	182
Digital Audio in Windows Vista.....	184
Per-Application Volume Control.....	184
Sound Recorder.....	186
Audio Devices and Sound Themes.....	187
Using Windows Photo Gallery	188
Grouping Images	189
Image Metadata and Tagging	189
Searching Images with Instant Search	191
Editing an Image	191
More Tools	191
Easy Listening in Windows Media Player 11	192
Navigating the Library.....	193
Album Art and the WMP Interface	194
Grouping and Stacking Media.....	194
Media Metadata and Tagging	195
Instant Search	197
Syncing with Media Devices	198
Media Sharing.....	199

Tips for Working with Windows Media Player	200
Playing Media Files	200
Setting Windows Media Player's Playback Options.....	202
Copying Music from an Audio CD	204
Copying Tracks to a Recordable CD or Device	207
From Here	208
8 Vista's Tools for Business: Contacts, Calendar, and Faxing	209
Managing Your Contacts	209
Creating a New Contact	211
Communicating with a Contact	216
Working with Contacts	216
Scheduling with Windows Calendar.....	219
Navigating Dates.....	220
Changing the Calendar View.....	221
Scheduling an Appointment	222
Working with Multiple Calendars.....	229
Importing Calendar Files.....	230
Sharing Calendars.....	231
Sending and Receiving Faxes.....	233
Starting Windows Fax and Scan.....	234
Creating a Fax Account	235
Entering Some Personal Data	235
Sending a Fax.....	236
Working with Fax Cover Pages.....	239
Receiving Faxes.....	242
From Here	245
9 Mobile Computing in Windows Vista	247
Accessing Notebook Features with the Mobile PC Control Panel.....	248
Monitoring Your Notebook with the Windows Mobility Center.....	249
Managing Notebook Power	250
Monitoring Battery Life.....	251
Specifying a Power Plan	252
Creating a Custom Power Plan	253
Configuring Your Notebook's Power Buttons.....	255
Attaching an External Monitor	256
Configuring Presentation Settings.....	257
Understanding Windows SideShow	259
Getting the Most Out of Your Tablet PC.....	260
Changing the Screen Orientation	262
Setting Tablet PC Options	262

	Working with the Tablet PC Input Panel.....	263
	Using Pen Flicks.....	266
	Setting Pointer Options.....	268
	Personalizing Handwriting Recognition.....	268
	Using the Snipping Tool.....	272
	From Here.....	273
10	Using Control Panel and Group Policies	275
	Operating Control Panel.....	275
	Reviewing the Control Panel Icons.....	277
	Understanding Control Panel Files.....	282
	Easier Access to Control Panel.....	284
	Implementing Group Policies with Windows Vista.....	286
	Working with Group Policies.....	286
	Example: Controlling Access to Control Panel.....	289
	From Here.....	290
11	Getting to Know the Windows Vista Registry	291
	A Synopsis of the Registry.....	291
	A Brief History of Configuration Files.....	292
	The Registry Puts an End to INI Chaos.....	293
	Understanding the Registry Files.....	294
	Navigating the Keys Pane.....	295
	Understanding Registry Settings.....	296
	Getting to Know the Registry's Root Keys.....	296
	Understanding Hives and Registry Files.....	299
	Keeping the Registry Safe.....	300
	Backing Up the Registry.....	301
	Saving the Current Registry State with System Restore.....	301
	Protecting Keys by Exporting Them to Disk.....	301
	Working with Registry Entries.....	303
	Changing the Value of a Registry Entry.....	303
	Renaming a Key or Setting.....	309
	Creating a New Key or Setting.....	310
	Deleting a Key or Setting.....	310
	Finding Registry Entries.....	310
	From Here.....	311
12	Programming the Windows Script Host	313
	WSH: Your Host for Today's Script.....	313
	Scripts and Script Execution.....	315
	Running Script Files Directly.....	315

Using WScript for Windows-Based Scripts.....	316
Using CScript for Command-Line Scripts.....	317
Script Properties and .wsh Files.....	318
Programming Objects	319
Working with Object Properties.....	320
Working with Object Methods.....	321
Assigning an Object to a Variable	322
Working with Object Collections.....	323
Programming the WScript Object	324
Displaying Text to the User.....	325
Shutting Down a Script	325
Scripting and Automation.....	325
Programming the WshShell Object.....	331
Referencing the WshShell Object.....	332
Displaying Information to the User.....	332
Running Applications.....	336
Working with Shortcuts	336
Working with Registry Entries.....	339
Working with Environment Variables	341
Programming the WshNetwork Object.....	343
Referencing the WshNetwork Object.....	343
WshNetwork Object Properties.....	343
Mapping Network Printers	344
Mapping Network Drives	344
Example: Scripting Internet Explorer	345
Displaying a Web Page	346
Navigating Pages.....	346
Using the InternetExplorer Object's Properties	347
Running Through a Sample Script.....	348
From Here	349
13 Customizing the Windows Vista Interface	351
Customizing the Start Menu for Easier Program and Document Launching.....	352
Getting More Favorite Programs on the Start Menu	352
Clearing the Recent Programs List.....	354
Customizing the Internet and E-mail Icons	355
Setting Program Access and Defaults.....	356
Pinning a Favorite Program Permanently to the Start Menu.....	357
Streamlining the Start Menu by Converting Links to Menus.....	358
Adding, Moving, and Removing Other Start Menu Icons	359

Customizing the Taskbar for Easier Program and Document Launching.....361

- Displaying the Built-In Taskbar Toolbars361
- Setting Some Taskbar Toolbar Options362
- Creating New Taskbar Toolbars362
- Improving Productivity by Setting Taskbar Options363
- Displaying Multiple Clocks for Different Time Zones365

Controlling Taskbar Grouping.....367

Modifying the Start Menu and Taskbar with Group Policies368

Using Screen Space Efficiently369

From Here372

14 Tuning Windows Vista’s Performance 373

Vista’s Performance Improvements374

- Faster Startup374
- Sleep Mode: The Best of Both Worlds375
- SuperFetch with ReadyBoost: The Faster Fetcher376
- Restart Manager378

Monitoring Performance380

- Viewing Your Computer’s Performance Rating.....380
- Monitoring Performance with Task Manager382
- Using the Reliability and Performance Monitor.....385

Optimizing Startup389

- Reducing or Eliminating BIOS Checks.....389
- Reducing the OS Choices Menu Timeout.....390
- Turning Off the Startup Splash Screen.....390
- Upgrading Your Device Drivers.....390
- Using an Automatic Logon391
- Configuring the Prefetcher.....391

Optimizing Applications.....391

- Adding More Memory391
- Installing to the Fastest Hard Drive391
- Optimizing Application Launching392
- Getting the Latest Device Drivers392
- Optimizing Windows Vista for Programs392
- Setting the Program Priority in Task Manager.....393

Optimizing the Hard Disk394

- Examining Hard Drive Performance Specifications.....394
- Performing Hard Drive Maintenance.....394
- Disabling Compression and Encryption395
- Turning Off the Indexer395
- Enabling Write Caching395

Converting FAT16 and FAT32 Partitions to NTFS	396
Turning Off 8.3 Filename Creation.....	397
Disabling Last Access Timestamp.....	397
Optimizing Virtual Memory.....	398
Storing the Page File Optimally	398
Splitting the Page File.....	398
Customizing the Page File Size.....	398
Watching the Page File Size.....	399
Changing the Paging File's Location and Size.....	399
